Explanation of the Articles of the Calendar.

These pages are calculated for Toronto, Quebec, Fredericton, and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The column, SUN ON MERIDIAN, gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of longitude 4 h. 46 m. W. When in the column headed Moon's rising or setting, or Moon on meridian, the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4 h. 46 m. W. They are not corrected for parallax or refraction.

The column, UPPER TRANSIT OF POLE STAR shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4 h. 46 m. W. It passes the meridian in the morning from April 9 to October 8, and in the afternoon from October 10 to April 8. On October 9, there are two transits, namely, at 0m. 21s. a.m. and at 11h. 56m. 25s. p.m.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of its preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the pole star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

MOON'S PHASES.—This Table gives the times for the four meridians when the moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, i.e., the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	-5' 38"	-3' 51"	-1' 59"	0' 0"	+ 2' 4"	+4' 16"	+6' 35"	+ 9' 2"	+11' 37"
2nd Correction for each minute of latitude.....	+ 1.8"	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.4"	+ 2.6"	+ 2.7"

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar, or added to it, according as the degrees of latitude are less or greater than 45° .

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude $43^{\circ} 20'$... 1st correction = $- 3' 51''$

2nd correction $+ 1.9 \times 20 = + 0' 38''$

" " $47^{\circ} 40'$... " = $+ 4' 16''$

" " $+ 2.3 \times 40 = + 1' 32''$

" " $45^{\circ} 10'$... " = $+ 0' 0''$

" " $+ 2.1 \times 10 = + 0' 21''$

If the altitude of Pola is above the horizontal plane observed at the time of its meridian transit be corrected for refraction, the latitude of the place of observation will be found by subtracting the polar distance from the altitude so corrected, for the upper transit, and by adding the polar distance to the corrected altitude, for lower transit.

By observing Polaris with a horizontal circle at the time of its upper or lower meridian transit the direction of the meridian may also be found; but as its motion in azimuth at these instants is more rapid than at other points of its course, any error in the time will then produce the greatest possible effect on the azimuth. Near the time of greatest elongation, on the other hand, the change of azimuth is very slow; so that an error in the supposed time of observation will occasion a comparatively small error in the azimuth. On this account the instant of greatest elongation east of west of the meridian is the time most favourable for the determination of the meridian.

Again, as the point of greatest elongation is the one at which the change of altitude is most rapid, any error in the time will produce a comparatively large error in the altitude. Hence this part of the star's path is the worst that could be taken for finding the latitude.

As the transits of Polaris and the times of its greatest elongation often take place when the sky is clouded, or during daylight, several days may sometimes pass without the recurrence of an opportunity favorable for these observations with Polaris.

To remedy to some degree this inconvenience, tables are herewith given which contain the times of transit of three other circumpolar stars, with the intervals between the times of transit and of greatest elongation; and also their azimuths at the same instant.

Of the three stars β , ϵ , & δ Ursæ Minoris, δ , from being nearest to the pole, is on the whole the best adapted for the determination of the meridian; while β , though convenient on account of its greater brightness, is less suitable than the other two; since the length of the interval between the times of its meridian passage and greatest elongation, as well as its azimuth at the latter time, are both greatly affected by a change in the latitude.

On examining the table, it will be seen that an error of $10'$ in the assumed latitude will occasion an error of about $4'$ in the azimuth of the star.

In order to harmonize with the rest of the Calendar, where the times of transit of Polaris have been usually placed, the transits of that star are given in civil time; for greater convenience however the transits of β , ϵ , & δ Ursæ Minoris in the following table are in astronomical time, being reckoned from noon to noon. For the sake of brevity the transits are given for the 1st, 11th and 21st, and also on those days when two transits take place.

The times of meridian passage on any intermediate day may be readily found with sufficient accuracy by subtracting the following numbers from the recorded time that next precedes it in the table.

Number of days after day last recorded	1	2	3	4	5	6	7	8	9	10

As in the case of the Pole Star, the lower transits of each of these stars will occur 11h 58m 2s (nearly) after the time of upper transit.

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45° .

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the polestar given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45° .

Eclipses

In the year 1872 there will be two Eclipses of the Sun, and two of the Moon.

I.—A partial eclipse of the Moon, May 22, 1872. The middle of the eclipse occurs before the Moon rises in Canada. The last contact with the shadow occurs soon after the Moon rises at Halifax and Fredericton, but before she rises at western stations. The last contact with the Penumbra takes place after the Moon rises at the places named below, but before she rises at Fort Garry.

The following Table contains the local mean astronomical times at which such phases as are visible occur.

II.—An annular eclipse of the Sun, June 5, 1872, invisible in Canada. The line of central eclipse extends from a point in the Indian Ocean (Lat. 59° 43' N. Long. 65° E.) across the Indian Peninsula and China, to a point in the Pacific (Lat. 27° 32' N. and Long. 155° 36' W.).

III.—A partial eclipse of the Moon, November 14, 1872, visible in Canada.

The local mean times at which the various phases occur at different stations are given in the following table.

FISHERIES OF THE DOMINION.

The aggregate value of the Fish products of the Provincial Fisheries is computed, by the Minister of Marine and Fisheries, to be nearly seventeen millions of dollars. Americans employ—tonnage varying—between eight and eleven hundred vessels in these Fisheries.

Their estimated annual catch is valued at about eight millions of dollars. The probable value of capital embarked in carrying on the inshore Fisheries is computed at nine millions of dollars. Thus making a total interest of some seventeen millions of dollars.

THE METRIC SYSTEM.

An Act to render permissive the use of the Metric or of the Decimal System of Weights and Measures.—34 Vic. cap. 24.

WHEREAS for the promotion and extension of the internal, as well as of the foreign trade of Canada, and for the advancement of science, it is expedient to legalize the use of the Metric System of Weights and Measures: Therefore Her Majesty, by and with the advice and consent of the Senate and House of Commons of Canada, enacts as follows:

1. This Act may be cited as the "Metric Weights and Measures Act, 1871."

2. Notwithstanding anything contained in any Act or Law now in force to the contrary, no contract or dealing shall be deemed to be invalid or open to objection, on the ground that the weights or measures expressed or referred to in such contract or dealing, are weights or measures of the Metric System, or on the ground that decimal subdivisions of legal weights and measures, whether Metric or otherwise, are used in such contract or dealing.

3. The tables in the schedules hereunto annexed shall be deemed to set forth, in terms of the standard weights and measures of Canada and the United Kingdom, the equivalents of the weights and measures therein expressed in terms of the Metric System; and such tables may be lawfully used for computing, determining and expressing, in weights and measures of Canada and of the United Kingdom, weights and measures of the Metric System.

4. Whenever the Governor in Council is of opinion that it has become necessary and desirable, he may direct Standards of Metric Weights and Measures to be procured and legalized, and verified copies of them to be provided, and may by Order in Council make regulations for authorizing and facilitating the use of the same, for the verification of Metric Weights and Measures in use in Canada.

MATHEMATICAL DEPARTMENT.

We have again to notice a large number of solutions of the Problems in the Almanac for 1871. It is gratifying to know that this Department is appreciated by so many intelligent correspondents throughout the country. Upwards of twenty attempts at the solution of the Prize Problem were received, only one of which was correct: that sent in by Mr. Andrew Doyle, Teacher of St. Patrick's School, Hamilton, to whom of course the prize was awarded. A correct solution of the Prize Problem was also received from Mr. W. Fleming, Teacher School No. 20 Markham, but too late to compete for the prize. We insert this year another Prize Problem; and those who send in its solution before February 15th, 1872, will have a chance for Smith's Classical Dictionary.

Correspondents who desire written replies to their questions will please defray the expenses of postage. All communications to this Department must be in the hands of the publishers, Messrs. Copp, Clark & Co., before July 1st, 1872.

NOTE.—We have to apologize to Mr. Sheehan for not giving him credit for solving Problem 9 of 1870, which he did correctly. Mr. R. S. Finlay is also entitled to much credit for having made a thorough investigation of Problem 13 of 1869: he is prepared to show on the best authority that the answer given in the Almanac is incorrect.

Mathematical Acknowledgments.

Answers to Problems, 1871.

PROB. 1. \$7.20 per week. PROB. 2. $\frac{123}{44}$, $\frac{114}{44}$, $\frac{107}{44}$ and $\frac{90}{44}$. PROB. 3. 111 miles. PROB. 4. 30.564 + miles. PROB. 5. $\frac{m(n-r)}{n-m}$ pieces of first and $\frac{n(m-r)}{m-n}$ of second. PROB. 6. A's $1\frac{7}{8}$ months. B's $1\frac{1}{2}$ months. C's $3\frac{3}{4}$ months. D's $2\frac{3}{4}$ months, and E's $1\frac{1}{2}$ months. PROB. 7. (I) $\frac{1}{1}$; (II) $\frac{1}{2}$; (III) $\frac{1}{3}$. PROB. 8. $(n-1)$ sons. PROB. 9. 64.334 yards. PROB. 10. Wine to water as .73426 is to .26574. PROB. 11. $\frac{100}{x} \left(\frac{m}{n-m} \right)$ per cent. PROB. 12. 170.537 = area. PROB. 13. SOLUTION. Let a = radius of circular area or inverse measure of the skill of the shooter, H = probability of hitting the same area, M = fraction expressing the probability in question—certainty being expressed by 1, then we have $M = \left(\frac{a}{H} \right)^2$ and $H = 1 - M$. Then by question $a = r \sqrt{\frac{\log 2}{\log M}}$. Then $\log 100 = 2.000000$ and $\log 89 = 1.949390$. Then $1.949390 - 2.000000 = -.050610$; and $\log 2 = .301030$. $r = \frac{1}{2}$. Then $a = \frac{1}{2} \sqrt{\frac{.301030}{-.050610}} = \frac{1}{2} \sqrt{5.948033} = \frac{1}{2} \times 2.438 + = 1.219$ feet. Then diameter required = 2.438 ft. See Herschel on Target Shooting. PROB. 14. 130 miles. PROB. 15. Area of first circle 63.6174, of 2nd = 55.9780 +. of 3rd 7.0680 +. of 4th 2.23914. PROB. 16. \$24, \$48, \$96, and \$192 respectively. PROB. 17. \$36 = A's stock; \$400 = B's, and \$450 = C's. PROB. 18. 59.15 + miles. PROB. 19. 109 $\frac{5}{8}$ undenary. PROB. 20. 197061.7338 acres in circular farm, and 250905.6 acres in square.

Mathematical Problems.

(1)-(69). A miller mixes flour which cost him \$5 per barrel with some which cost him only \$3 per barrel, and sells the mixture at \$5.40 per barrel, making 42.5 per cent. Required the proportions of mixture?

(7)-(70). Required the length of the longest chain by which the three following distances can be exactly measured: 84 yards 1 foot 8 $\frac{1}{2}$ inches; 146 yds 2 $\frac{1}{2}$ inches; and 222 yards 2 feet 9 $\frac{1}{2}$ inches.

(3)-(71). When two metals are mixed in equal volume they form a compound of specific gravity 9; when they are mixed in equal weights they form a compound of specific gravity 8 $\frac{1}{2}$. Find the specific gravities of the metals?

(4)-(72). 1 lb. of tea, 3 lbs. of sugar, $\frac{1}{2}$ lb. of tobacco and $\frac{1}{2}$ lbs. of coffee cost together \$1.66; but if tea were to rise 12 per cent., sugar 30 per cent., and tobacco 10

per cent., while coffee remained unchanged, they would cost \$1.85. Find their prices?

(5) (73). A sphere whose radius is 10 inches and weight 5 lbs. is suspended by a string. Required the tension of the string when the sphere is wholly immersed in water?

(6) (74). There are two quantities, m and n , whose arithmetical mean is x ; the geometrical mean is y ; and the harmonical mean z . If $x - y = 3\frac{1}{2}$, and $x - z = 6\frac{1}{2}$; find m and n .

(7) (75). In order that x may be real in the fraction $\frac{x^2 - 2x + 21}{6x - 14}$ show between what limits the value of the fraction cannot lie.

(8) (76). In De Lisle's thermometer the freezing point is 150° and the boiling point zero. What degree of this thermometer corresponds to 47° Fahrenheit?

(9) (77). Two men, A and B, take shares in a Petrolia

oil well, to the amount altogether of \$1850. They sell out at par, A at the end of 2½ years, B at the end of 7½, and each receives in capital and profit \$1,400. How much did each embark?

(10) (78). The sum of four numbers in arithmetical progression is 30, and the sum of their reciprocals is $\frac{7}{144}$. Required the numbers?

(11) (79). Find the value of m , so that $5x + 2y = m$ may have ten positive integral solutions, excluding zero values, and that the value of m may be as great as possible.

(12) (80). Prize Problem. A sledge moves down an inclined snow plane 140 feet long and 30° inclination, and when arrived at the bottom proceeds along a horizontal one until friction brings it to rest. If the coefficient of friction between the snow and the sledge be taken = .05; what space will the sledge describe along the horizontal plane, neglecting the resistance of the air.

Problems contributed by Correspondents.

(13) (81). By John Sheehan. A has 4173.5 bushels of wheat which he wishes to barter with B for oats; B consents to do so on condition that each bushel of wheat shall be worth only 45¢ cents more than a bushel of oats. How many bushels of oats must B give A for the wheat?

(14) (82). By Adam Murray. A bubble of air having a diameter of 4 inches passes from the bottom of a lake to the top 120 fathoms. Required the diameter of the bubble on reaching the surface?

(15) (83). By Wm. Fleming. A person left A for B at the same time that another left B for A. The first arrived at B 3½ hours and the second arrived at A 5½ hours after meeting. How long was each upon the road?

(16) (84). By W. G. Kidd. A refiner had a tank full of alcohol containing 177147 gallons, from which he drew a certain vessel full, and filled up the tank with water. He repeated this process 11 times, when he found only 2948 gallons of alcohol left in the tank. Find the capacity of the vessel?

(17) (85). By J. S. Dundon. A rectangle which is $(x - b)$ units long and $(y - c)$ units wide contains $(a + c)$ units; but if it were $(y + c)$ units long and

$(y + c)$ units wide, it would contain $(1 + b)$ units. Find integral values for x .

(18) (86). By John Matthews. Solve the equations

$$I. \quad x^3 + x^2 + x^2 - ax^2 - x - 1 = 0.$$

$$II. \quad x^2 + x^2 - 6x = 0.$$

(19) (87). By A. Doyle. The distance from a given point within a right angle to one of the legs is 25, and to the other 11; a line drawn through it and terminated by the legs is a minimum; on this line and on its two segments semicircles are described. Find the area of a circle to touch the three; also the area of each of the three spaces included between the points of contact.

(20) (88). By Wm. Dunne. A variable right angled triangle revolves about a given point 6 feet from the centre of a circle of 11½ feet radius; the triangle being continually in the plane of the circle and the right angle at the given point; also the extremities of the hypotenuse are in every position in the circumference of the given circle; and from these extremities tangents are, in every case, drawn to the given circle. Required the length of the path traced out by the intersection of every pair of tangents, and the space included between the said path and the given circumference.

The Colony of British Columbia, by order of Her Majesty the Queen in Council, dated the 20th day of July, 1871, was admitted into the Union or Dominion of Canada. The following are the terms of union:

Canada to be liable for the debts and liabilities of British Columbia existing at the time of the Union.

British Columbia not having incurred debts equal to those of the other Provinces now constituting the Dominion, to be entitled to receive, by half-yearly payments in advance from the General Government, interest at the rate of five per cent. per annum on the difference between the actual amount of its indebtedness at the date of the Union, and the indebtedness per head of the Provinces of Nova Scotia and New Brunswick (27.77), the population of British Columbia being taken at 60,000.

The following sums to be paid by Canada to British Columbia for the support of its Government and Legislature, to wit, an annual subsidy of \$35,000 and an annual grant equal to 80 cents per head of the said population of 60,000, both half-yearly in advance, such grant of 80 cents per head to be augmented in proportion to the increase of population, as may be shown by each decennial census, until the population amounts to 400,000, at which rate such grant shall thereafter remain, it being understood that the first census be taken in the year 1881.

The Dominion to provide an efficient mail service, fortnightly, by steam communication, between Victoria and San Francisco, and twice a week between Victoria and Olympia; the vessels to be adapted for the conveyance of freight and passengers.

Canada to assume and defray the charges for the following services:—Salary of the Lieutenant Governor; Salaries and allowances of the Judges of the Superior Courts and the County or District Courts; the charges in respect to the Department of Customs; the Postal and Telegraphic services; protection and encouragement of Fisheries; provision for the Militia; lighthouses, buoys and beacons, shipwrecked crews, quarantine and marine hospitals, including a marine hospital at Victoria; the Geological Survey; the Penitentiary; and such further charges as may be incident to and connected with the services which, by the British North America Act of 1867, appertain to the General Government, and as are or may be allowed to the other Provinces.

Suitable pensions, such as are approved of by Her Majesty's Government, to be provided by the Government of the Dominion for those of Her Majesty's servants in the Colony whose position and emoluments derived therefrom were affected by political changes on the admission of British Columbia into the Dominion of Canada.

The existing Customs Tariff and Excise Duties to continue in force in British Columbia until the Railway from the Pacific coast and the system of railways in Canada are connected, unless the Legislature of British Columbia should sooner decide to accept the Tariff and Excise Laws of Canada. When Customs and Excise Duties are, at the time of the Union of British Columbia with Canada, leviable on any goods, wares, or merchandise in British Columbia, or in the other Provinces of the Dominion, those goods, wares and merchandise may, from and after the union, be imported into British Columbia from the Provinces now composing the Dominion, or from either of those Provinces into British Columbia, on proof of payment of the Customs or Excise Duties leviable thereon in the Province of exportation, and on payment of such further amount (if any) of Customs or Excise Duties as are leviable thereon in the Province of importation. This arrangement to have no force or effect after the assimilation of the Tariff and Excise Duties of British Columbia with those of the Dominion.

British Columbia to be entitled to be represented in the Senate by three members, and by six members in the House of Commons. The representation to be increased under the provisions of the "British North America Act of 1867."

The influence of the Dominion Government to be used to secure the continued maintenance of the naval station at Esquimaux.

The provisions of the "British North America Act of 1867," to be applicable to British Columbia in the same way and to the like extent as they apply to the other Provinces of the Dominion, and as if the Province of

British Columbia had been one of the Provinces originally united by the said Act.

The Government of the Dominion undertake to secure the commencement simultaneously, within two years from the date of union, of the construction of a Railway from the Pacific towards the Rocky Mountains, and from such point as may be selected, east of the Rocky Mountains, towards the Pacific, to connect the seaboard of British Columbia with the Railway system of Canada; and further, to secure the completion of such Railway within ten years from the date of the union.

And the Government of British Columbia agree to convey to the Dominion Government, in trust, to be appropriated in such manner as the Dominion Government may deem advisable in furtherance of the construction of the said Railway, a similar extent of public lands along the line of Railway throughout its entire length in British Columbia, not to exceed, however, twenty (20) miles on each side of said line, as may be appropriated for the same purpose by the Dominion Government from the Public Lands in the North-west Territories and the Province of Manitoba. Provided that the quantity of land which may be held under pre-emption right or by Crown grant within the limits of the tract of land in British Columbia to be so conveyed to the Dominion Government shall be made good to the Dominion from contiguous public lands; and provided further, that until the commencement, within two years, as aforesaid, from the date of the union, of the construction of the said Railway, the Government of British Columbia shall not sell or alienate any further portions of the public lands of British Columbia in any other way than under right of pre-emption, requiring actual residence of the pre-emptor on the land claimed by him. In consideration of the land to be so conveyed in aid of the construction of the said Railway, the Dominion Government agree to pay to British Columbia from the date of the union, the sum of \$100,000 per annum in half-yearly payments in advance.

The Dominion Government will guarantee the interest for ten years from the date of the completion of the works, at the rate of five per centum per annum, on such sum, not exceeding £100,000 sterling, as may be required for the construction of a first class graving dock at Esquimaux.

The charge of the Indians, and the trusteeship and management of the lands reserved for their use and benefit to be assumed by the Dominion Government, and a policy as liberal as that hitherto pursued by the British Columbia government to be continued by the Dominion Government after the union.

To carry out such policy, tracts of land of such extent as it has hitherto been the practice of the British Columbia Government to appropriate for that purpose, shall from time to time be conveyed by the Local Government to the Dominion Government in trust for the use and benefit of the Indians, on application of the Dominion Government; and in case of disagreement between the two Governments respecting the quantity of such tracts of land to be so granted, the matter shall be referred for the decision of the Secretary of State for the Colonies.

MEDICAL INSTITUTIONS AND SCHOOLS.

MEDICAL COUNCIL.—The act, called "The Ontario Medical Act," incorporates the whole profession of Ontario under the name of "The College of Physicians and Surgeons of Ontario," and grants certain powers to the College which are exercised by an executive body called "The Council of the College, &c." The profession, through its Council, has the power of establishing a curriculum of studies, which shall be observed by all medical teaching bodies in Ontario, and by all students of medicine.

The act also deprives all universities, colleges or schools of medicine of the privilege hitherto enjoyed, of granting a diploma entitling its holder to legal recognition in this Province, and places the sole licensing power in the hands of a Board of Examiners to be annually appointed by the Council. The degree or diploma of an university or college of any part of the world henceforth only possesses an honorary value in Ontario, unless granted before the 23rd day of July, 1869. Only British or Colonial diplomas confer any rights if granted before that date.

Every person, in order to become legally qualified to practice, is required to have his name registered in the Register kept by the Registrar of the College. This Register is published annually and sold to the public, and may be obtained by applying to the Registrar of the College.

Letters, &c., prepaid for transmission, "*via New York*" or "*via Detroit*," are forwarded direct to New York or Detroit with every mail made up for these Post Offices. West Indian mails are despatched as follows, from New York: for Havana and the West Indies, *via* Havana, every Thursday afternoon; for St. Thomas, the West Indies, and Brazil, on the 23rd of every month.

POSTAGE RATES, ETC., ON PATTERNS AND SAMPLES WITHIN THE DOMINION.

Patterns or samples of merchandise and goods for sale, not exceeding 24 oz. in weight, may be posted in Canada to be forwarded to any place within the Dominion, on prepayment by postage stamp of a rate of 1 cent. per ounce, under the following regulations:

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples however of seeds, drugs, and so forth, which cannot be sent in open covers, may be enclosed in bags of linen or other material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The Packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; also a trade mark and numbers, and the price of the article enclosed; *inside*, there must be no enclosure but the samples or patterns themselves; the particulars however of the trade marks, numbers and price, may be marked on the articles themselves, instead of on the outside of the Packet, at the option of the sender.

Any sample or pattern Packet containing a letter, or otherwise violating the conditions of the preceding rules, will be rated and treated as a letter.

The rate of one cent. per ounce is to be pre-paid by postage stamp, and, if such rate be not fully pre-paid by the stamps affixed, the Packet is to be rated with the deficient postage and a fine of five cents in addition.

Packets of samples and patterns may be registered on prepayment by postage stamp of a registration fee of 5 cents in addition to the postage rate, and provided such Packets be handed in to the post office for registration.

POSTAGE RATES, ETC., ON PATTERNS AND SAMPLES, TO UNITED KINGDOM AND FOREIGN PARTS.

Patterns of merchandise, and samples, may be forwarded between Canada and the United Kingdom, France, Italy, German Empire, Netherlands, Portugal, Switzerland, and Denmark, by the Canadian Packet mails, at book post rates, and subject to the following conditions:

There must be no writing or printing other than the address of the person for whom the packet is intended, the manufacturer's or trade mark and number, and price of the article.

Samples of seeds, drugs, and similar articles intended for delivery within the United Kingdom, are now allowed to be sent in bags entirely closed, provided such bags be transparent, so that the officers of the Post Office may be able to satisfy themselves of the contents.

Bags entirely closed, even though they may be transparent, must not be used for the transmission of seeds to foreign parts.

The rule which prohibited the transmission through the Post, as patterns, of articles of cutlery, &c., has been rescinded; and scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pieces of metal or ore, and such like articles, are now allowed to be forwarded by the Post as samples, provided they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags, and to the persons of the officers of the Post Office. Such articles, however, must be so packed that they may be easily examined; and it is made a rule that any packet containing such articles, which may be found to be insufficiently guarded, shall not be forwarded through the Post.

None of the articles named in the next preceding paragraph may be sent as patterns or samples to any place abroad, except Germany, Belgium, and the British Colonies, and not to these places when addressed *via* France.

List of Post Offices in Canada on the 1st August, 1871.

The Offices printed in *Italics* are authorized to grant and pay Money Orders. The Offices marked * are Savings Bank Offices. The letters "W. O." following the name of a Post Office, signify "Way Office." The capital letters on the right of the County column indicate the several Provinces of the Dominion.

To meet the wishes of many of our friends in Ontario, we have, though only in the case of that Province, substituted the name of the Township in which the Post Office is situated for that of the Electoral Division. Should the name of the County also be required, reference may be made to the list of Township Municipalities (see Ind-x).

LEGAL AND JUDICIARY.

THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the act 37 Geo. III, c. 13, which enabled the then practitioners of the law to form themselves into a society and make rules for its government. By the act of 1822, 2 Geo. IV, c. 6, "the Treasurer and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By the act of last session, 34 Vic. c. 15, the Benchers heretofore appointed from time to time by their own body, are made, exclusive of *ex officio* members, elective by the Bar. The *ex officio* consisting of the Attorney General for the time being, and all members of the Bar of Ontario who have at any time held the office of Attorney or Solicitor General of the former province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario. The elective thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the act. Vacancies during the term to be filled by the remaining Benchers. The Judges of the Superior Courts are Visitors of the Society, and, on the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, and who is also President of the Society. The Benchers sit in convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head quarters of the Society, in which is provided accommodation for the Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

Confederation Life Association OF CANADA.

HEAD OFFICE, MASONIC HALL, TORONTO.
GUARANTEE CAPITAL, \$500,000.

STOCK AND MUTUAL PLANS COMBINED.

Deposited with the Dominion Government for security of Policy Holders, \$50,000.

THIS ASSOCIATION offers the following advantages :

1. It is a Canadian Institution, under home management.
2. Perfect security, furnished by character of Directors, wealthy proprietary, and large guarantee capital, only one-tenth of which participates in profits.
3. Holders of Mutual Policies share in profits and management. By the Act of Incorporation, at least one-third of Board of Directors must be chosen from the holders of this class of Policies, and at least nine-tenths of profits thereon must be distributed among such policy-holders.
4. Equal and just application of non-forfeiture principle—not arbitrary, but fixed by charter.
5. A Policy free from vexatious restrictions—being nearly world-wide.
6. Its investments made in Canada—thus fostering home enterprises and tending to counteract the present drain from this source upon our wealth into foreign channels.
7. Comparatively low rates—its premiums with profits over ten per cent. less than those ordinarily charged by mutual companies, and its rates without profits over 25 per cent. less than the same.

WILLIAM McCABE,

GENERAL MANAGER.

MASONIC HALL, TORONTO.

JOHN MACDONALD & CO.

ESTABLISHED 1849.

Commencing in the above year in a modest and unpretentious manner, they have by patient industry, untiring diligence, and unceasing attention, steadily and safely extended their business until it has reached its present

COLOSSAL PROPORTIONS.

They have passed unscathed through every COMMERCIAL CRISIS which has swept over this Country during the last

TWENTY-TWO YEARS.

A fact, which alone furnishes AMPLE SECURITY to every customer doing business in their house. For the carrying on of their large business

THEY EMPLOY NO TRAVELLERS,

And when it is stated that the increase of their sales in the September of 1871, as compared with September 1870, was over

\$50,000!!

It will at once be apparent that they REQUIRE NONE. To the Trade of the

DOMINION OF CANADA

They would say that—They buy their goods in every instance for Cash.—They possess a thorough knowledge of the British and Canadian Markets.—They buy from Manufacturers and First Hands.—They buy very Largely and therefore very Cheaply.—They keep a resident European Buyer.—They receive goods weekly from the British Markets.—They keep all their Departments constantly assorted—Their stock at the lowest point is rarely less than \$225,000—They have an efficient Head in every Department.

In their HABERDASHERY DEPARTMENT they have always very full lines of

EVERY CLASS OF SMALL WARES,

Including an immense Stock of J. & J. CLARKS & CO.'S Six-Cord Cable Laid THREADS, whose Mills in Paisley are said to be the most extensive of the kind

IN THE WORLD.

THEIR STAPLE DEPARTMENT for extent and variety is widely known throughout the country, and exhibits a large increase in its turn over EVERY SEASON.

THEIR FANCY DRESS GOODS AND STUFF DEPARTMENTS embrace the Novelties of the Scotch and English Markets, in addition to all the shades in French Merinos.

THEIR SILK AND MANTLE DEPARTMENTS contain full lines of British and Foreign Silks, with latest styles in Mantles and Jackets, with materials for manufacturing the same.

THEIR MUSLIN AND LACE DEPARTMENT is very large, and embraces full ranges of English and Scotch Muslins, with all classes of Laces.

THEIR WOOLEN DEPARTMENT is one of the largest in the country, and contains full lines of

ENGLISH, SCOTCH AND CANADIAN GOODS.

IN THEIR ORDER DEPARTMENT—all orders are accurately and promptly executed and forwarded; securing all possible attention. Their Office and Warehouse are each under wise and prudent management; their aim being to secure throughout the entire establishment

The greatest possible Perfection of System and Management.

JOHN MACDONALD & CO.

Have learnt during their long Business Experience a great many Lessons, and among them the following, viz. :—

That there is no royal road to success ;

That if a man will be prosperous he must be diligent ;

That no business can be successful where the EXPENDITURE is not closely watched ;

That a man should UNDERSTAND the business he undertakes ;

That nothing is lost by being courteous and attentive to all ;

That money is a poor substitute for character ;

That judicious INSURANCE is a wise expenditure of means ;

That the neglect of it is a wrong alike to the man himself and his creditors ;

That if men are well served they will gain little by changing ;

That it is bad for men to buy HORSES, BUGGIES, PIANOS, FINE CARPETS, and VILLAGE LOTS until they can COMFORTABLY take the money for the same out of their profits, and do this without having to ask any one to wait for them.

That it is a bad thing for a man to be careless about his obligations.

That the stain of a DISHONEST COMPROMISE can only be wiped out by a resolute determination to redeem one's CHARACTER ;

That buying well means selling well ;

That keeping one's stock well and constantly assorted means a steadily increasing business ;

That the neglect of these points may be a slow but is a certain way of destroying any business ;

That live and let live is a good motto ;

That PATIENT RESOLUTE DETERMINATION to vanquish difficulties and extend business upon sound and upright principles, will always in the end meet with

THEIR REWARD.

JOHN MACDONALD & CO.

Have no hesitation in saying that the observance of these principles would save an amazing amount of

SUFFERING AND LOSS,

Would secure a large amount of

SOUND PROSPERITY,

And will be of immense value to any one who adopts them as a part of their

BUSINESS SYSTEM.

— o —
They will be happy to see at

THEIR WAREHOUSE IN TORONTO,

Traders from any part of the

DOMINION OF CANADA OR UNITED STATES,

And if to the mutual advantage of all parties concerned will be happy

TO DO BUSINESS WITH THEM.

UNBOUNDED SUCCESS OF THE
**FLORENCE SILENT-MOTION
SEWING MACHINE.**

The Florence Sewing Machine is the only machine that makes four kinds of stitches, three of which are made on no other machine, and are stronger and more elastic than any other.

It is the only machine that can sew in more than one direction, having a reversible feed.

It has an improved hemmer, making any width of hem, and easily managed. Owned exclusively by the Florence Company. It is the only machine having a self-adjusting shuttle tension; a great improvement over all others, rendering it easy to do good work on any fabric. It fastens the end of a seam better and quicker than a seamstress can.

Active Agents Wanted in every Town and County in the Province.

"Twelve years ago I purchased a Florence Sewing Machine. It has been in use ever since, and has not required a shilling's worth of repairs."

Great caution is necessary as to where proprietary articles are purchased, particularly those with reference to the toilet. Shopkeepers of small repute offer for sale their spurious and pernicious imitations of proprietary articles, under the lure of being cheap, regardless of the consequences. ROWLAND'S TOILETTE REQUISITES, their MACASSAR OIL, KALYDOR, and OODONTO are peculiarly the subjects of these innovations.

POLICIES PAYABLE DURING LIFE TIME.

The important and peculiar feature originally introduced by this Company, in applying the periodical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the **BRITON MEDICAL AND GENERAL** to be almost unparalleled in the History of Life Assurance. *Life Policies on the Profit Scale become payable during the lifetime of the Assured, thus rendering a Policy of Assurance a means of subsistence in old age, as well as a protection for a family, and a more valuable security to creditors in the event of an early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.*

Its artistic excellence places it alongside of the standard illustrated weeklies of the world.—*Montreal Daily Witness*.

We have great pleasure in calling attention to the great improvement in the illustrations of the *Canadian Illustrated News*. Mr. Desbarats deserves to be assisted by the Canadian public in his costly enterprise.—*The Globe, Toronto*.

Such a publication should receive the hearty support of every true Canadian.—*Evening Herald and Province, London, Ont.*

No Canadian gentleman's library will be complete without this valuable paper.—*Hamilton Evening Times*. Its engravings are very fine and its literary department complete.—*Cayuga Sentinel*.

It should command the support of all Canadians.—*The Paris Transcript*.

The *Canadian Illustrated News* is undoubtedly one of the best artistic papers published in the Colonies which we have received up to this date, and the *tout ensemble* does great credit both to editor and artist, on whom the task of success of so attractive a weekly depends.—*European Mail, London, Eng.*

This excellent weekly periodical now comes to us greatly improved in its style of illustrations. Bartlett," "Waltham Watch Co.," "Appleton, Tracey and Co.," "Am. Watch Co.," and "American Watch Co.," these are all **WARRANTED** by **SPECIAL CERTIFICATE**, except the "Home." The guarantee of the Company should, in all cases, be required, by the buyer. In no other way can **WORTHLESS IMITATIONS** be avoided.
